

Background

- Undergraduate Studies
 - B.S. Astronomy, B.S. Physics – University of Washington
- Teaching, Outreach
- Space surveillance
- Rocky Planets Around Cool Stars (RoPACS)
 - Collaborate with European space industry on future Exoplanet space missions

Current Areas of Research

- Direct exoplanet imaging with current ground-based technology
- Design studies at Astrium for potential future space missions
- Work in Paris on an end-to-end simulation of space-based planet imaging
