

The Young Suns and Exoplanet Survey (YSES) is a snapshot survey that targets 70 solar type stars of ~15 Myr in Sco-Cen to discover and characterise wide-separation planetary mass companions.

YSES

Richelle van Capelleveen, Leiden Observatory

WiSPIT

The Wide Separation Planets in Time (WiSPIT) is a snapshot survey which extends the YSES survey to 176 younger stars of 3 to 15 Myr.
